

CASE STUDY

CCTV - YAROOMBA PROJECT

OVERVIEW

A large civil contractor approached us as they needed CCTV cameras for their site and weren't happy with the quality of the cameras they were provided by another supplier.

As a regular customer of earth gear, the civil contractor trusted that we were able to support them.

CHALLENGES

At the time the enquiry was received by the team, we didn't have CCTV cameras in our fleet. We always aim to support our customers so our team acted quickly to source good quality and reliable CCTV cameras that would solve our customers problem while also still being a viable option for earth gear.

SOLUTIONS

We sourced 6 camera towers, each tower holding 2 cameras.

earth gear were able to source all the equipment, software and manpower required to install the CCTV cameras on site within 3 weeks.

RESULTS

We committed to sourcing camera towers to our customer with a promise to deliver the same service that we do with our dry hire equipment.

We supplied the 6 camera tower units for long term hire.
