# About Us

earth gear is the leading dry hire civil machinery and attachment business in Queensland, with branches located on the Sunshine Coast and Brisbane. We are dedicated to supporting the diverse needs of our clients with exceptional service and a wide range of reliable machines and attachments.

# Core Competencies

## » Comprehensive Equipment Inventory

Our extensive fleet includes a diverse range of well-maintained earthmoving and civil machinery, equipment, and attachments, ensuring that we can meet the requirements of various projects and industries.

## » Expert Technical Support

Our team of experienced professionals are able to provide expert technical support and guidance to our clients select the right equipment and attachments for their specific needs and ensure smooth operations throughout the hire period.

## » Flexible Hire Options

We offer flexible hire options tailored to meet the unique needs of each project, including short-term, long-term, and customised hire agreements, providing clients with cost-effective solutions and maximum flexibility.

# Supported clients

- » Councils
- » Civil Construction Companies
- » Civil Engineering Firms
- » Infrastructure Projects
- » Industrial Facilities
- » Landscaping Contractors
- » Mining Operations

# Six Points of Difference

## » New Gear Guarantee

We will supply near new, full civil spec equipment every time.

## » Breakdown Guarantee

We will fix a breakdown in 4 hours or the day's hire is free.

## » Delivery Guarantee

We will deliver within an hour of the promised time, or the freight to site is free.

## » Extras Guarantee

- We won't charge minimums if it keeps raining.
- We won't charge environmental, waste fees or cleaning charges under 30 minutes.
- We won't add profit when you damage a machine.

## » Experience & Technical Support Guarantee

We will only have highly experienced service techs and fitters responding to your breakdowns and skilled sales and customer service people supporting you with your technical requirements

## » Attachments Guarantee

- We have the most extensive range of attachments available in Queensland.
- We will provide the right solution and will take the time to understand your unique requirements.

# Our Fleet machines

## Excavators

We offer a vast array of excavators from 1 tonne to 50 tonne to suit various project requirements

## Wheel Loaders

Our fleet from 8 to 40 tonne includes wheel loaders designed for efficient material handling and loading tasks including IT loaders

## Tracked Loaders

For projects requiring enhanced traction and manoeuvrability, we provide tracked loaders from 50 to 100 HP

## Water Carts

We offer water carts equipped with high-capacity tanks for dust suppression and water transportation needs

## Tipplers

Our tippers are ideal for transporting bulk materials and waste on construction sites

## Rollers

We provide rollers for soil and asphalt compaction, ensuring a smooth and durable surface

## Tracked Dozers

Our tracked dozers are suitable for various earthmoving and grading applications

## Articulated Dump Trucks

Designed for off-road hauling, our articulated dump trucks are rugged and reliable

## Site Dumpers

We offer site dumpers for efficient material handling in confined spaces

## Rock Hammers

Our rock hammers are ideal for breaking and demolishing rock and concrete surfaces and are suited to most varieties of pickups

earth gear

# Our Fleet attachments

## Augers

We provide augers for drilling holes in soil and other materials with precision

## Hydraulic Grabs

Our hydraulic grabs are perfect for handling and placing materials such as rocks, logs, and debris

## Sieve Buckets & Stick Rakes

We offer sieve buckets and stick rakes for efficient sorting and separation of materials on-site.

## Compaction Wheels

Our compaction wheels are used for compacting soil in trenches and confined spaces

## Hydraulic Compaction Plates

Designed for compacting soil and asphalt, our hydraulic compaction plates ensure uniform compaction

## Pulverisers

We provide pulverisers for crushing and pulverising concrete and other demolition debris

## Metal Shears

Our metal shears are ideal for cutting and recycling metal scraps on-site

## Timber Shears

We offer timber shears for efficient cutting and processing of timber and wood debris

## Rumble Grids

Our rumble grids are used for creating textured surfaces on roads and pavements

## Road Plates

We provide road plates for temporary roadways and ground protection during construction activities
